## HARDWARE

- CPU with 32K words of memory, automatic power-fail recovery, autoloader, and operator's console.
- 10 MByte Disk subsystem
- CRT Terminal (80 characters by 24 lines)
- Wood-grain office-styled desk
- Multi-User BASIC System Software
- Complete user and system documentation

## SOFTWARE

- The Multi-User system software is developed around an extended version of the BASIC language, providing an integrated operating system and BASIC compiler
- Memory and disk space is shared for optimum interactive performance.
- Files are created and accessed by name under program control.
- Data and program files are key protected, insuring against accidental alterations.
- Lock control protects against inadvertent device interaction between users.
- Peripheral and system diagnostics assure integrity and aid in system maintenance.
